

FX Technical Update

Broad dollar stays in tactical range, but there are a lot of technical developments across the various pair charts that are worth a look

- EUR/USD tests 1.1214-1.1276 key breakout support zone after building a potential short-term top pattern. A downside break back into the 2024 trading range would seek the 1.1026-1.105 support zone, in our view. Overhead resistance rests at 1.1502-1.1741
- GBP/USD starts to carve out what looks more like a downside reversal pattern near the 1.3436 Sep 2024 peak and other resistance levels. First support rests at 1.3163, with initial medium-term levels in the 1.29-handles
- USD/JPY fades after a three-step bounce from key longer-term support near 140. We still see Fibonacci levels surrounding 147 as a likely ceiling for the pair and see a material chance for an eventual break below 140 into the summer months
- AUD/USD tries to extend after stalling near key resistance levels surrounding 0.64, which includes the 200-day moving average. While our view is starting to get pressed back on its heels, we still think the pair turns lower from nearby resistance

See page 6 for analyst certification and important disclosures.

J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

EUR/USD sets back and tests the key 2024 range breakout levels

EUR/USD set back from the 1.1571 Apr peak that faded in the lower end of a 1.1502-1.1741 broad resistance zone (Figure 2). That resistance includes the Feb Elliott 5-th wave objective, 2020-2021 pattern breakdown area, and Sep 2022 channel trend line. In our view, the 1.1214-1.1276 2024 range highs and Mar 27 38.2% retrace level mark a key inflection. A break below would likely gather downside momentum after a failure to maintain the breakout from a well-defined range. Furthermore, the Apr price action above that threshold now looks like a short-term top pattern along with the momentum divergence signal that triggered as the market reversed from the current trend high (see yellow signal above price in chart). The initial support for a breakdown rests at the 1.1026-1.105 confluence of Feb-Mar Fibonacci retracement levels, 50-day moving average, and Apr reversal pattern measured move objective. Alternatively, continued price action above the range breakout zone would likely lead to a continued near-term range below the medium-term resistance levels noted above.

Figure 2: EUR/USD tests 1.1214-1.1276 key breakout support zone after building a potential short-term top pattern. A downside break back into the 2024 trading range would seek the 1.1026-1.105 support zone, in our view. Overhead resistance rests at 1.1502-1.1741.

Cable price action near the Sep 2024 peak looks more like a potential reversal pattern

GBP/USD continues to stall in a tactical range below 1.3398-1.3575 resistance that includes the Sep 2024 peak, Jan-Apr .618 swing objective, May 2021 78.6% retrace, and a pair of medium- to longer-term trend channel trend lines (Figure 3). The two-sided price action following the late-Apr impulse to higher prices triggered a pair of our momentum divergence sell signals, pattern-based signals that suggest an increased the probability for at least some downside mean reversion. Initial support for a pullback rests at the 1.3163 Apr 7 38.2% retrace. Any weakness through that support would indicate a more lasting downside trend reversal, in our view. That would then turn our attention to initial medium-term support levels in the 1.29-handles that include the Jan 38.2% retrace, Jan-Apr trend line, and Apr 61.8% retrace. That is also where the pair was trading heading into the early-Apr tariff announcement. Also note the rising 1.2846 200-day moving average that may converge on that support cluster in the weeks ahead. Alternatively, a re-acceleration of the rally through the noted channels would leave the 1.3816 Jan-Apr equal swings objective as the next material resistance level.

Figure 3: GBP/USD starts to carve out what looks more like a downside reversal pattern near the 1.3436 Sep 2024 peak and other resistance levels. First support rests at 1.3163, with initial medium-term levels in the 1.29-handles.

USD/JPY bounce from critical pattern support near 140 fades below 147 favored resistance

The **USD/JPY** bounce from critical support near 140 came in the form of a corrective three-wave structure that tentative faded below a confluence of Fibonacci retracement levels at 146.89-147.18 (Figure 4). In our last note, we presented that area, which now aligns with the 50-day moving average as a likely ceiling for the pair. In our view, the market lacked a convincing medium-term bullish reversal pattern as it turned up from the 140 area, which in turn leaves the pair subject to a retest of that zone. When one takes a step back and sees that the 2023-2025 price action above the 138.88-140.25 support zone has the clear pattern of a head and shoulders top and then puts that pattern in the context of the nontrivial risk that the trade war leads to a more pronounced global slowdown, subsequent USD/JPY pressure on that pattern support may well lead to an impulsive breakdown. While initial support sits at the 136.50 Jul 2024-Jan 2025 equal swings objective, the amplitude of the multi-year top pattern has much more bearish implications for the pair.

Figure 4: USD/JPY fades after a three-step bounce from key longer-term support near 140. We still see Fibonacci levels surrounding 147 as a likely ceiling for the pair and see a material chance for an eventual break below 140 into the summer months.

AUD/USD rally pressures key resistance near 0.64

Despite the recent deceleration pattern near key resistance surrounding 0.64, the AUD/USD rebound stays in gear and tentatively breaks above the 0.645 200-day moving average (Figure 5). We've been looking for the broader global risky market rebounds to fade at a variety of overhead pattern breakdown and retracement resistance zones. Those market, including AUD/USD are pressing toward and into those zones now. While clear deceleration and the formation of bearish downside reversal patterns shy of the critical zones would have made life easier to maintain a negative medium-term outlook, we will stick with that view provided a broad array of the related markets do not show impulsive rallies through their respective levels. For AUD/USD specifically, sustained strength above the 200-day moving average would put a bearish bias well back on its heels and leave the 0.6365-0.655 cluster of Feb 2023/Sep 2024 retracement levels as the next resistance layer. That is followed by the 0.6683 Feb 2023 61.8% retrace. On the downside, a break back below the 0.6415 Oct 2022 internal trend line would put the negative view back on solid ground, and a push below the 0.6344 short-term pattern low would confirm a reversal, in our view. The April low bottomed near the 0.5921 Jan-Mar pattern objective and 0.5876 Oct 2024-Mar 2025 .618 swing objective. A retest of that zone remains our base-case outlook provided the market doesn't see a material or sustained break above the 200-day moving average.

Figure 5: AUD/USD tries to extend after stalling near key resistance levels surrounding 0.64, which includes the 200-day moving average. While our view is starting to get pressed back on its heels, we still think the pair turns lower from nearby resistance.

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of April 05, 2025

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	50%	37%	13%
IB clients**	51%	49%	37%
JPMS Equity Research Coverage*	47%	40%	13%
IB clients**	74%	69%	52%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. Furthermore, such opinions, forecasts or projections are subject

to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
