

NVIDIA Corporation

Reinforces Annual Product Cadence – Extends Product Roadmap into CY28; New Model Innovations and AI Advancements Drive Higher Compute Intensity

Yesterday, Nvidia hosted its keynote at the GPU Technology Conference (GTC 2025), providing updates on its accelerated computing/AI products, platforms, and solutions across its focus end-markets, and announced it is on track for a 2H ramp of its next-gen chipset, the Blackwell Ultra (B300), targeting AI/datacenter acceleration with a 50% improvement in compute performance versus its current generation Blackwell platform. The key takeaways from the event were: 1) AI model innovations, such as DeepSeek, should drive significantly higher compute complexity and require higher compute performance/intensity, and the team demonstrated how a prompt utilizing a reasoning model requires 20 times more tokens and 150 times more compute compared to traditional LLM models. 2) Nvidia's aggressive roadmap is driving better economics (TCO/performance), with the scaling potential of AI inference requiring 100 times more compute than the team had anticipated last year. 3) The Blackwell Ultra is expected to ship in the second half of the year, offering a 50% performance gain over Blackwell. It will feature an expansion of HBM content to 288 GB of HBM3e memory, compared to 192GB in the original Blackwell. However, the HBM content for Rubin remains flat at 288GB of HBM4 memory, slightly below expectations. 4) GPU density per rack is not expected to increase until the Rubin Ultra platform (CY26 Rubin will have the same GPU density as Blackwell – there were expectations for an NVL144 (2-die per GPU) and potentially NVL288 rack architecture, but that does not appear to be the case until the Ultra series in CY27). 5) As expected, co-packaged optics (CPO) adoption will begin with switching (offered as an optional SKU alongside mainstream pluggable SKUs). Nvidia is expected to launch their CPO solution in the 2H of this year (will still offer pluggable solution as its high volume SKUs). However, we believe adoption of CPO-based switches may remain limited due to technical challenges, reliability/manufacturability concerns, and vendor lock-in. We believe a more significant use case for CPO is for scale-up GPUs/GPU connectivity, though the team remains committed to copper cabling for as long as feasible. 6) Nvidia continues to expand its software and ecosystem to accelerate AI adoption. 7) Nvidia is leveraging its full-stack development platform to move into the humanoid robots market. With leading silicon (GPU/DPU/CPU), hardware/software platforms, and a strong ecosystem, Nvidia is well-positioned to benefit from major secular trends in AI, high-performance computing, gaming, and autonomous vehicles, in our view. NVIDIA continues to remain 1-2 steps ahead of its competitors. We reiterate our OW rating on NVDA.

Summary Investment Thesis and Valuation

Investment Thesis

We believe NVIDIA continues to execute across all segments. While 1H is typically seasonally weaker than 2H, we expect solid demand in PC gaming to be a strong revenue driver for the company, offsetting PC OEM, which is in secular decline. We expect the data center segment to grow strongly as hyperscale customers continue to embrace GPU-accelerated deep learning for processing large data sets. We are encouraged by strength in the automotive and enterprise segments as well, although strong adoption of autonomous driving in the market remains to be seen. We anticipate significant upside in the shares, driving our Overweight rating.

Valuation

Our Dec-25 PT of \$170 assumes the stock trades at 30-35x \$5.20 of earnings power exiting CY25. Our earnings multiple is consistent with its potential earnings CAGR of 30-35%+ over the next few years led by the continued strong datacenter growth, monetizing an incremental ~\$14B of auto revenue pipeline and incremental software, licensing, and subscription revenues over the next several years.

This document is being provided for the exclusive use of JIAXIN LIU at THE HK UNIVERSITY OF SCI & TECH GZ.

- **AI advancements drive new scaling laws and increase compute intensity/complexity.** During the keynote session, Jensen Huang presented a compelling case on how innovations in AI models, such as DeepSeek, will drive higher compute complexity and necessitate increasing compute demand. For instance, the team demonstrated how a prompt utilizing a reasoning model requires 20 times more tokens and 150 times more compute compared to traditional LLM models. This underscores the need to sustain the demand for more advanced and higher-performance compute platforms. Furthermore, new AI advancements, such as agentic AI and physical AI, will drive new scaling laws and likely further increase overall compute complexity/intensity. The team also used peak year GPU shipment increases as a reflection of the increasing compute intensity/demand – highlighting 1.3M prior year Hopper GPU peak shipments versus CY25 YTD (shipments + orders) demand for its new Blackwell GPU platform at 3.6M GPU die (1.8M B200 GPUs – two GPU die per B200 package) across the top-4 US cloud service providers.
- **Next-gen Blackwell Ultra on track for 2H ramp, reinforcing its aggressive one-year product cadence, and extending its technology roadmap into CY28.** The newly introduced Blackwell Ultra offers a 1.5x performance improvement over the current-gen Blackwell platform. These products are expected to begin shipping in the second half of the year. In the second half of CY26, Nvidia plans to ramp its new Rubin GPU architecture (~3.3x performance improvement over Blackwell Ultra), which will utilize next-generation HBM4 DRAM with 288GB. The DRAM content is flat gen/gen. The Rubin rack-scale system will feature 144 GPUs (72 packaged chipsets), and is equivalent in GPU density to the GB200/300 NVL 72. The Rubin NVL 144 is expected to deliver 3.3x higher performance than the Blackwell Ultra NVL72 and is utilizing the 6th generation GPU copper interconnect NVLink switching platform. Additionally, alongside the rollout of the Rubin GPU, Nvidia will introduce its new 3nm ARM-based CPU processors, named Vera. In the second half of calendar year 2027, the company plans to launch the enhanced “Ultra” version of its Rubin GPU. The Rubin Ultra NVL 576 will feature a 144 GPU chipset based on a 4-chiplet architecture, offering 14x higher performance than the Blackwell Ultra NVL72. Looking further ahead, Nvidia has extended its product roadmap into calendar year 2028 with the introduction of the Feynman GPU architecture, which will incorporate the 8th generation NVL Switch architecture.
- **As expected, extended its networking roadmap to include co-packaged optics (CPO) optional SKU for scale-out networking, while retaining copper focus for scale-up networking.** For scale-up networking, Nvidia remains committed to using copper and copper cabling within rack-scale system alongside its NVLink proprietary connectivity. For scale-out networking, the adoption of CPO will begin with switching, expected to launch in the 2H of this year as an optional SKU (alongside mainstream pluggable optical SKUs). However, we believe the adoption of CPO-based switches will remain limited due to technical challenges, reliability/manufacturability issues, and vendor lock-in. We believe a bigger use case for CPO adoption will be for the GPU/GPU connectivity (scale-up) over the next few years.
- **Continues to expand its software/ecosystem to accelerate the adoption of AI.** The company’s ecosystem and software-driven focus have established and likely will continue to ensure product leadership across its target end-markets and domains. Nvidia has developed over 900 domain-specific CUDA-X libraries and AI models, highlighting their diverse and extensive CUDA libraries and rich developer ecosystem. Recent additions include cuDSS, a direct sparse solver library, and cuQuantum for quantum computing. Nvidia has launched the Llama Nemotron

family of models, which feature reasoning capabilities to enable developers and enterprises to build agentic AI platforms. Additionally, Nvidia is leveraging its full-stack platform to enter the humanoid robot market. The company unveiled the Nvidia Isaac Groot N1, the first open humanoid robot foundation model, along with the GR00T BLUEPRINT software for training and teaching robots. In the automotive sector, Nvidia continues to expand its pipeline and announced a partnership with GM for next-generation vehicles, factories, and robots. The team also introduced Nvidia Dynamo, an open-source software designed to accelerate and scale AI reasoning models in AI factories.

Investment Thesis, Valuation and Risks

NVIDIA Corporation (*Overweight; Price Target: \$170.00*)

Investment Thesis

We believe NVIDIA continues to execute across all segments. While 1H is typically seasonally weaker than 2H, we expect solid demand in PC gaming to be a strong revenue driver for the company, offsetting PC OEM, which is in secular decline. We expect the data center segment to grow strongly as hyperscale customers continue to embrace GPU-accelerated deep learning for processing large data sets. We are encouraged by strength in the automotive and enterprise segments as well, although strong adoption of autonomous driving in the market remains to be seen. We anticipate significant upside in shares, driving our Overweight rating.

Valuation

Our Dec-25 PT of \$170 assumes that NVIDIA trades at a 30-35x multiple applied to ~\$5.20 of annualized earnings power exiting CY25E (\$1.30 *4). Our earnings multiple is consistent with its potential earnings CAGR of 30-35%+ over the next few years led by the continued strong datacenter growth, monetizing an incremental ~\$14B of auto revenue pipeline and incremental software, licensing, and subscription revenues over the next several years.

Risks to Rating and Price Target

- Although PC gaming demand seems resilient to macroeconomic weakness, any macro uncertainty could weigh on PC gaming demand trends. Given NVDA's ~53% exposure to the PC gaming segment, any consumer PC gaming weakness poses downside risk to our estimates.
- NVIDIA's GPUs could gain lower than expected deployment into data center applications as hyperscale customers further adopt deep learning as a new and effective way of processing large unstructured data sets. Any significant decrease in the adoption of deep learning by hyperscale customers or increase in competition could result in downside risk to our revenue and earnings estimates.

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Apr 04, 2002. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over

the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

JPMS Equity Research Coverage*	47%	40%	13%
IB clients**	73%	68%	52%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory

advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts’ views and research, and it may also engage in transactions for its own account or for its clients’ accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
